

Tampa Bay Clean Cities Coalition

Membership Brochure

Tampa Bay Clean Cities Coalition works with vehicle fleets, equipment manufacturers, city and county governments, fuel providers, utilities, community organizers, and individuals to promote clean, domestic alternative fuels and technologies.

Our Coalition

- Founded in 2012 by the Environmental Protection Commission of Hillsborough County, TECO Energy, the Center for Urban Transportation Research, and the Patel College of Global Sustainability
- Supported by 20+ members from government, industry, utilities, environmental organizations, universities, transit agencies, and citizens in our six-county region (Hillsborough, Pasco, Pinellas, Manatee, and Sarasota counties)
- Increased the use of biodiesel, propane, natural gas, electricity, ethanol, and anti-idling technologies

Align your organization with Clean Cities to show your support for cleaner transportation.

Join today and connect to a wealth of knowledge and experience that can help your organization capitalize on the benefits of alternative fuels.

We are the area's recognized resource for technical assistance, networking, identification of grant opportunities, and information exchange in the area of advanced transportation options, fuels, and technologies.

"As an organization that values maintaining a level of mobility that contributes to an enhanced quality of life for the Tampa Bay area, Tampa International Airport (TPA) is a proud member of Tampa Bay Clean Cities Coalition (TBCCC). As the Tampa Bay area continues to grow, smart, sustainable transportation planning is needed now more than ever. TPA remains a dedicated member of TBCCC as we continue to strive for innovative transportation solutions that improve the health and welfare of our community and promote environmental stewardship."

Eric Caplan, Sustainability & Resilience Program Director
Tampa International Airport

"Florida Transportation Systems is proud to be involved with TBCCC and strives to further the goal of promoting clean, alternative fuels with both our products and customers. The Tampa Bay region and all its residents, as well as visitors, will continue to enjoy the benefits of environmentally friendly transportation and practices through the efforts of TBCCC and its members."

Christopher Rustman, President
Florida Transportation Systems, Inc.

Our Efforts

Our 450+ members and stakeholders work to reduce petroleum use to create a safer, cleaner Tampa Bay. Investing in alternative fuels like electricity, biofuels, natural gas, and propane leads to improved health and welfare of our community and a robust regional economy.
